Say Alu...
...TO A NEW
REVOLUTION
IN FLOORING

Experience the future of luxury flooring with Aluwood Floorboards Ltd. Our innovative new design features internal aluminium floorboards that perfectly mimic the aesthetics of traditional materials. One design, with two insulation options.

Eco-Friendly & Energy Efficient: Being a brilliant heat conductor, these floorboards work superbly with underfloor heating, as well as containing cooling properties making them suitable for both hot and cold climates. Made from solid aluminium, Aluwood Floorboards are 100% recyclable, providing a green & practical alternative.

Lightweight & Speedy Installation: Being over 50% lighter than solid floorboards at only 6kg/m², these floorboards are extremely easy and quick to install with seamless tongue and groove finish, effectively reducing installation costs.

Durable & Sustainable: Offers greater durability than natural wood, with benefits such as termite resistance, slip resistance, non-combustibility, and no harmful VOCs. They provide a safe and sustainable flooring solution that lasts over 50 years.

A NEW REVOLUTION IN FLOORING

Non-combustible floorboard with removeable B1 fire rated foam insulation

Suitable for all types of commercial and residential buildings.

Size: **1500mmL x 150mmW - 15mmD**

Aluwood Floorboards offer an extensive range of benefits and features, making them an outstanding choice for any luxury flooring project. They provide a sustainable and eco-friendly alternative to traditional wooden floorboards, combining practicality with style. With 35 authentic colours to choose from, Aluwood Floorboards beautifully mimic the natural aesthetic

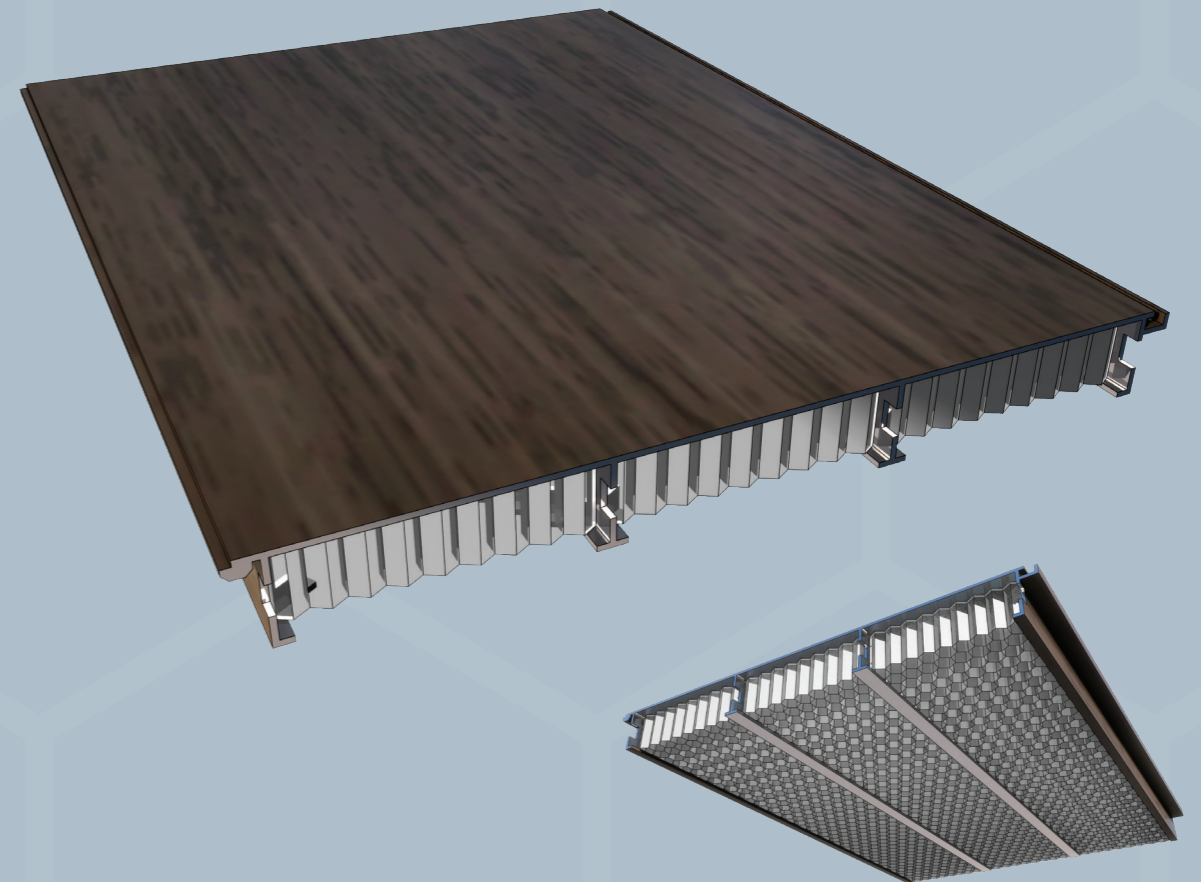

of traditional materials while delivering superior performance. Their durability, easy maintenance, and compatibility with both underfloor heating and cooling systems ensure that they meet the demands of any environment, enhancing your space with a sophisticated and environmentally conscious solution.

Non-combustible floorboard with integrated aluminium honeycomb insulation

Certified for internal use in all types of marine vessels and suitable for all types of commercial and residential buildings.

Size: **1500mmL x 150mmW - 15mmD**

Energy efficient for both hot & cold climates:

Highly efficient at reducing energy costs by retaining heat and cooling to an extremely high standard.

Non-Combustible:

IMO Fire tested MSC 307(88). Complies with IMO FTPC Part 5 : Fire Test for surface flammability and IMO FTPC Part 2 : Smoke & Toxicity Test.

Slip and water resistant:

Complies with EN 16165: 2021 P1 classification.

No Maintenance:

No sanding, staining or oiling required – ever!

Quick & easy installation:

Seamless tongue & groove finish with no fixings required.

Lightweight:

Extremely lightweight at only 6kg/m² in comparison to traditional materials.

35 authentic timber, stone and marbel finishes:

Thermal transfer is printed and cured to produce a beautiful authentic finish.

Eco-Friendly:

100% recyclable making it a fantastic green alternative.

10 Year warranty:

Covered for non-discoloring for up to 10 years, long lifetime of 50+ years.

Versatile:

Suitable for internal residential and commercial projects as well as all marine vessels, making them extremely versatile.

Sustainable:

No logging or harmful VOC's making them suitable for a wide range of uses.

Insulated:

Designed with an integrated aluminium honeycomb or foam insulation which also holds sound proofing qualities, reducing overall costs.
